St. Hope Juneteenth Block Party at 40 Acres June 20, 2026

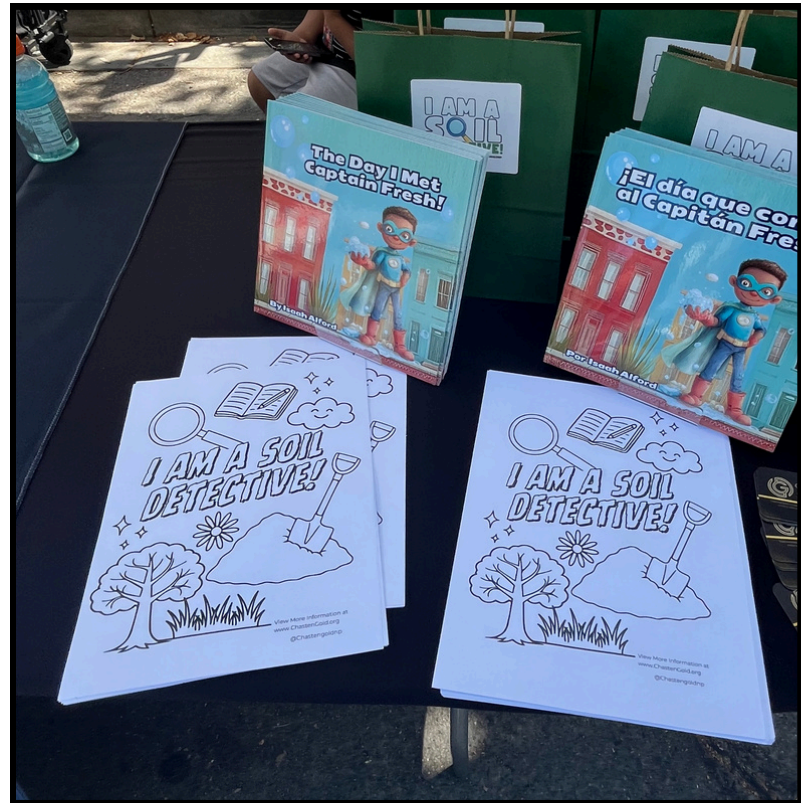

On June 20, 2026, Chasten Gold Nonprofit participated in the St. HOPE Juneteenth Block Party at the historic 40 Acres Complex in Sacramento. The event attracted a diverse audience of families, community leaders, local organizations, and residents celebrating Juneteenth while connecting with valuable community resources.

Chasten Gold presented its interactive contaminated soil demonstration, allowing children to experience firsthand how invisible contaminants can transfer from soil to hands during play. The activity encouraged meaningful conversations about environmental exposure prevention while providing families with practical health and safety recommendations.

Educational materials, environmental FAQ sheets, children's giveaways, and complimentary copies of *The Day I Met Captain Fresh* were distributed throughout the day. Staff discussed local contaminated site cleanup activities, encouraged residents to participate in future TAG meetings, and answered questions regarding environmental health concerns affecting Sacramento communities. The event further strengthened community partnerships while extending environmental education to historically underserved populations.

Chasten Gold, Nonprofit

"This was the funnest table me and mommy went to. I loved playing with the toys and learned so much of about soil safety. I'm a soil safety hero!"
